SHARED GOVERNANCE COMMUNICATION
A Statement From Sherry Buchanan, Ph.D.
Chair
Board of Governors
8/17/12

MSSU's Shared Governance Philosophy Statement includes the concept of "informed participatory collaboration."

Shared Governance requires effective representative communication. Campus-wide, representatives bring others' views to committees, senates, councils and other forums such as meetings of the Board of Governors. Constituents' interests must be accurately and responsibly shared as an essential element of Shared Governance. Reciprocally, representatives must also communicate back to the group they serve in a timely and accurate manner so that all on campus can share in "informed participatory collaboration."

I encourage all groups on campus to hold their representatives to this standard and am very appreciative to the people who take on the awesome responsibility of representing others in campus governance.
