## 2018-2019 Graduates

### Response to: What suggestions do you have for improving MSSU?

- Hands on opportunities to strengthen resumé - Better advising for graduate school search and acceptance - GRE preparation course and/or tutoring
A veterans lounge that would only be accessible through the student ID. A quiet place for study.
A wider variety of ALL ONLINE masters programs.
Allow more funding for the IET program.
As a full-time employed and full-time long distance learner, I would suggest that online classes sync due dates onto the Blackboard due date calender. Which makes it so much easier to quickly know upcoming due assignments. I also don't agree with the added fee for being a distant learner.
Be more welcoming to Christians and those who don't support non-christian like issues.
Better advisory for incoming students. There was a real lack of communication between the advisors and the students.
Better computers in the library computer lab.
Better contact with students. I felt like my college experience would have been improved by having more guidance and information from a mentor.
better job placement
Better parking, better communication to students on events
Cheaper
Continue small class sizes when possible; If possible, make classes available every semester rather than just one semester a year
Do not ignore the theatre department
Engineering department needs more equipment, not enough to learn, sometimes too many students are sharing machine or having to work out of their own extra time to catch up.
Expand recruitment area to include online students in neighboring states. I live in AR, so Joplin/Springfield jobs aren't a possibility for me.
Focus more on job preparation and finding student's employment.
Friendlier staff, having easier access to advisors, not changing a persons advisor multiple times during educational career, treating transfer students like they matter.
Get rid of respondus browser lockdown, it lags, costs for some classes and just plain sucks. ☹️♂️ offer more programming classes. I originally wanted CIS degree, but after learning that southern only offers programming in C# I had to switch my major. Hint: java is the language almost every enterprise goes with, not C#. Just a thought, wasted a semester on a class.
Get the community to have more pride in the school.
Have a better support from the community and make student organizations popular.
Have more majors do a senior capstone project and internships to better prepare graduates for graduate school and job applications.
Hire better professors. Perform a complete overhaul on the MSM program. Stop preaching "diversity is our strength".
Hiring teachers who actually teach and don't only scroll through power point presentations and do the bare minimum to collect their paycheck.
I enjoyed my time there
I had a hard time getting ahold of my counselors during my time as an online student.
I wish I would have had more opportunity to learn skills that employers are telling me that I am lacking. Courses using QuickBooks and other accounting software would benefit those entering the workforce. I wish there would have been more emphasis placed on how important it is to complete an internship while in school. As an online student, I feel like I missed information that may have been given to seated students. Aside from that, I would not trade my experience at MSSU for anything. Dr. Smith was a huge help throughout my journey giving me encouragement and boosting my self-confidence. He was by far the best professor I have had since I started my higher education path.
I would say have more of a presence.
In the communications department it would be very useful to have a class about social media and SEO.
Job placement. Advisors need to be active in helping students.
Keep better track of financial and academic records. It's not fun dealing with times where the university doesn't have stuff down that you did correctly.
Lower tuition
make students and faculty more aware of dental hygiene program
Monthly emails over jobs on campus
More advertisement of services and how those services can help. Preferably not by email because I use to delete all emails sent out because there's so many sent out everyday.
More classes available for night students.
More equipment to work with, printers that work, and tutors for the engineering department.
More guidance in creating schedules for the program. The program lacks this guidance and forced students to take harder classes at the same time or having to wait til another seasonal semester to finish the degree.
More Masters programs like MBA or MHA
More online classes. Teachers who are currently working in the business environment. More practical application rather than teachers disassociate with current business trends
More options on class times Afternoons Saturday and early evening
More parking
MSSU is a great instiution
No online or e-book should ever be offered.
None. I've loved my experience at MSSU, just wish I had been closer.
Offering classes in Spring and Fall instead of simply offering them one or the other.
Online classes need to be tablet friendly.

## Response to: What suggestions do you have for improving MSSU? (continued)

Online classes need to have full functionality on tablets.
Open the library later on weekdays like it used to be. Better food and more variety in the cafeteria. Stronger wifi is a must
Overall I believe Missouri Southern is a good institution. I think the major areas of improvement are adding more traditional courses, following more closely to the course catalog, and creating a simpler system to determine what it takes to complete a degree. This first of these would include some shifting of staffing and even probably a reduction in the number of classes for the increase in their quality. The second would be just a matter of following what is being told to the students. The third could literally be a formatting issue that would be corrected between all departments.
Parking lot space
Parking.
Physical necessities need fixed or updated like the toilets, sinks, and water fountains.
Prior to graduation, make every graduating student utilize the career services for a resume class or to look over their resume.
Produce more community involvement. Market to businesses in the community to showcase more green & gold and/or other Southern things. The students need to see that the Joplin area supports them. Visitors coming to Joplin need to be wowed at the support they see in the city.
Put Quick Links back on the website. Everyone was mad when the website updated and Quick Links was removed.
Reduce costs for graduation apparel or charge it sooner than the end of the year as my final grades are still on hold because I owe \$80.
Remove all distance learning fees. I should not have to pay to use my own equipment. Connect with those students not on campus and include them in all activities. I asked for information for the career fair and never received anything. I also have a closet full of dress suits that I was hoping to exchange for different sizes. I just gave up on trying to contact anyone.
Stop repeating information used in BS teaching program for Master's Program.
Student. Centered. Teaching.
Tennis team, table tennis team, more study rooms with white boards
The only suggestion is creating more online courses to complete degrees completely online. It took me a lot longer to graduate because I had to work full-time and go to school part-time due to not being able to take all online classes.
There isn't something that stands out, but longer hours for the coffee shop could be an improvement.
Vet the professors better... Multiple times an entire class will dislike a professor and give terrible reviews/ratings on semester-end reviews with nothing changing following semesters.
I suggest that MSSU overall take more time to consider the needs of their student base as a whole rather than the needs of select individuals. I know that this seems contrary to the beliefs established within the last few decades through programs such as no child left behind or common core. I feel though that there is a reason a majority exists rather than a large collection of "individuals." I think it can also be observed with a fair amount of ease that extremely inclusive programs actually end up excluding many more people than they include. The suggested changes I propose would include the discontinuation of nearly all online courses. They are extremely ineffective and overall devalue the education received at Missouri Southern. Yes some non-traditional students will be excluded, but the traditional students (the majority) would benefit greatly. A sub-clause to this point would be allowing professors who typically don't use blackboard not to. It is highly unnecessary in some courses to have mandatory discussion board posts or weekly quizzes based on the professor's individual teaching style. Secondly I suggest that Missouri Southern choose to establish programs and retain them at any costs. I am specifically referencing the paralegal certification, legal studies minor, and all other legal orientated areas of study that have consistently failed due to, I assume, the lack of preparation and determination from the departments or the institution as a whole. Overall I valued my time greatly at Missouri Southern and have gained a great deal of knowledge. I just urge that my opinion be taken seriously so that Missouri Southern can remain competitive in this market. I hope that my successive generations can ascertain the valuable resources I did at Southern. I also hope Missouri Southern continues to reach for the true pursuit of knowledge and not pursuing high enrollment rates. Some programs and students must be excluded for knowledge to prevail. If you have further questions I would love to spread my ideals. Thank you for giving my the opportunity to work hard and achieve greatness in my own right.
