Explore Boldly. Care Deeply. Impact Globally.

Computer Information Science

A degree in CIS can prepare you for graduate school or for entry-level positions such as systems programmer, systems analyst, applications programmer, database administrator, computer forensics analyst, user support specialist, network administrator, or website administrator.

Degree Options

Bachelor of Science
- CIS-Computer Forensics/Criminal Justice Administration
- CIS-Math/Computational Mathematics
- CIS-Information Technology

Associate of Science
- Information Systems

Certificates
- App Development
- Information Assurance & Security
- Website Administration

Minors
- Information Assurance & Security
- Information Systems
- Network Systems Administration
- Website Administration

Internships

A semester-long internship, spent working in the information technology area of an organization, provides an opportunity to use the skills that you have developed, a real-world experience in an organizational environment and an easier transition from life as a student to life as a computing professional.

Many of our students go on to start their careers at nationally and globally recognized companies.
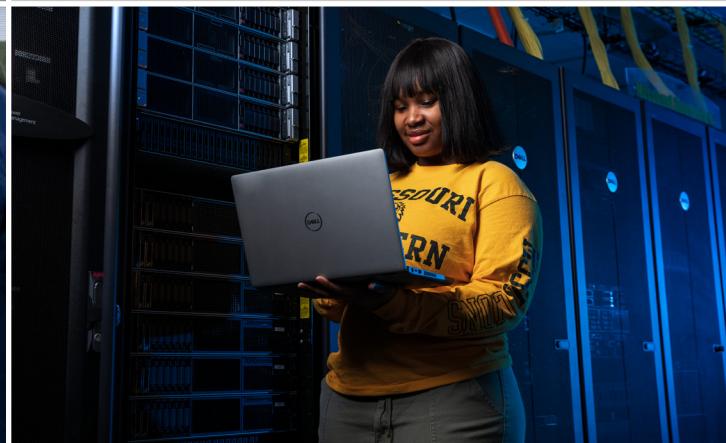

- Google
- Cerner Corporation
- Walmart
- Leggett & Platt
- CFI

- Schreiber Foods
- eBay
- Mayo Clinic
- Jack Henry & Associates

- TAMKO
- Liberty Utilities
- O'Reilly Auto Parts

Missouri Southern CIS graduates boast one of the highest average salaries when compared to other majors. Many CIS graduates hold positions as middle and upper-level managers in various organizations and several have earned graduate degrees.

"The CIS program at Missouri Southern offers exciting, rigorous and challenging course work for its students. I am really glad that I chose the program because I am passionate about technology and the materials I learn in class are always in sync with ever-changing technological concepts and skills in the real world."

-Aji Fatou Dibba, Graduate
